### **DETAILED ACTION**

The indicated allowability of claim 11 is withdrawn in view of the reference(s) to Ohkawa et al. (4,665,412). Rejections based on the newly cited reference(s) follow.

#### ***Claim Objections***

1. Claims 1-5, 8-10, 12 and 13 are objected to because of the following informalities: The term "substantially" in claim 1 is a relative term which renders the claim indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. If Applicant intends any particular position of the gate, it must be clearly recited.
2. Claim 1 recites the limitation "the further quantum well" in lines 6 and 7. There is insufficient antecedent basis for this limitation in the claim.
3. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Ohkawa et al. (4,665,412).
6. Re claim 11, Ohkawa et al. disclose a substrate with a multilayer structure, the multilayer structure including a quantum well structure having a semiconductor layer sandwiched by further layers of an electrical insulating material, wherein the semiconductor layer is enclosed by high-k materials with different dielectric constants (Col. 3, lines 28-33 and Col. 10, lines 10-17).

#### ***Allowable Subject Matter***

7. Claims 1-5, 8-10, 12 and 13 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.

#### ***Conclusion***
